When you're choosing a tap or mixer, the most important thing to know is that it's the right one for you and your home, whether yours is a high or low pressure hot water system. With Ideal Standard, you can rest assured you've chosen right, every time. Whatever your system, we can offer you a range of stylish, high quality taps and mixers that perform brilliantly.

As the leading European manufacturer of taps and mixers with over 100 years in complete bathroom solutions, we're pioneers in tap and mixer technology. Because we manufacture our own products, you're assured of the highest standards in everything from design and performance to strength and durability. Plus, our commitment to innovation means we can offer you the very latest in safety and water-saving ideas too.

We've got something for everyone. On the following pages, you'll discover a comprehensive range of simple and intuitive-to-use taps and mixers for bath, shower and basin, everything from classic to contemporary designs, every one high quality and high performing.

We're confident you'll find what you're looking for but if you have any questions just call us on 0800 590 311.

We'll be happy to help.
1 Led by Thomas Fiegl and Achim Pohl, the Artefakt design team produce products of simplicity, sensuality and a consistent ethos.

2 Melange, single lever innovation from Ideal Standard.

3 Our passion for careful thought-out functionality means you have maximum control, right there at your fingertips.

4 Our unique CLICK feature encourages water saving – the user lifts the handle until they feel a slight resistance. This informs the user that the fitting is delivering only 50% of its maximum flow potential. Lifting the handle further enables the fitting to deliver maximum flow.

5 All of our mixers and taps are made in Germany and Bulgaria and exceed European standards.

6 Each product is produced with the best materials to be robust and hard-wearing.

DEDICATED TO EXCELLENCE

Whatever you select from our extensive tap and mixer collection, you’re guaranteed excellence in three areas: design, performance and durability.

Award-winning design
At Ideal Standard, we put groundbreaking design at the heart of all that we do. We collaborate with Europe’s most exceptional, award-winning designers such as Robin Levien, Artefakt and David Chipperfield, all of them skilled practitioners in form and functional design. They’ve joined our engineering team to create signature designs that set the trend in contemporary tap and mixer design.

Brilliant performance
A mixer or tap that works perfectly is always our aim, whatever your system. Over the years, we’ve developed some very exciting technology to meet your changing needs. In fact, many of the great engineering advances in tap manufacture began life on the Ideal Standard drawing board. We manufacture products that give you maximum flow rates even in low pressure areas, products that are easy and safe to use whether you’re 3 or 93, and products that deliver water efficiency so you can save money and do your bit for the planet.

Built to last
Ideal Standard products are built to last; that’s our guarantee to you. We know that you need robust, high quality mixers and taps that can withstand the day-to-day rigours of home life so everything we make exceeds British and European standards and is subject to extensive life testing. Manufactured in Germany, the home of engineering excellence, using high quality materials, all our products come with a comprehensive five-year guarantee.
INNOVATIONS TO MAKE YOUR LIFE EASY

At Ideal Standard, we’ve perfected the next generation of mixers and taps ensuring you can enjoy unparalleled levels of comfort and control. Inspired by you and your family’s needs, these innovations feature everything from technology that allows you to limit flow levels so you can save water and energy to temperature control and Cool Body features for your comfort and safety.

1. **Save water and energy**
   - All our products have water-saving features built in. In fact, we were the first company to offer factory fitted flow regulators on our basin mixers. The ingenious CLICK technology in our single lever basin mixer and bidet mixer is designed to help you save water just lift the handle until you feel a slight resistance; this tells you you’re getting 50% of the mixer’s maximum flow. To achieve full flow, simply lift the lever to its maximum.

2. **Safety first for you and your family**
   - It’s only natural you put your family’s safety first and now, with our Cool Body innovation, you’ll never have to worry about fittings becoming too hot to touch. Not only that, our thermostatic control ensures you enjoy a safe temperature that’s maintained at all times, whatever water’s being used elsewhere in your home.

3. **Easy, speedy fitting**
   - Designed to allow you to fit your mixer from above the basin rather than below, where space is traditionally tight, our TopFix system means installation is fast and easy. The matching bidet mixer is also available with the TopFix system.

4. **Faster, more convenient bath fitting**
   - Idealfill fittings are separate from the filler so you can turn the water on and off from a convenient place on or around the bath while the water comes from a combined filler and overflow. So, no more stretching around the shower screen to turn your bath on. Idealfill delivers 23 litres of water per minute, faster than any other bath-filling system.

5. **Easy temperature control**
   - It’s so easy to control water pressure and temperature with a smooth, effortless handle featuring our pioneering ceramic disc technology. A single lever controls the pressure and temperature within a comfort zone of 30–45°C. So, you can limit water wastage and enjoy a more efficient flow rate – with no drips!
   - We’ve also developed a multi-port cartridge that enables even those with low pressure systems to enjoy a reliable, efficient flow. We’ve incorporated this technology into our one hole bath fillers too so you can match the single lever design of your basin filler with your bath mixers. We’re proud to say no other company offers this design feature.

6. **Extra safety**
   - Particularly important if you’ve got children, our temperature limit stop controls the temperature on the mixer when the tap is full on. This can be preset to suit your family’s comfort and safety.
On the following pages you’ll discover a comprehensive range of simple and intuitive-to-use taps and mixers for bath, shower and basin, everything from classic to contemporary designs, every one high quality and performing.

Domestic products all over the world bear the stamp of Cone’s creator, Robin Levien RDI. Robin is one of Ideal Standard’s most successful partners and has worked with us to create exemplary taps and mixers for over eight years. The UK’s best-selling bathroom suite, the Studio range, came from the creative mind of Robin Levien.
At Ideal Standard, we want to help you to save water as well as ensure you get the very best in comfort and reliability.

High flow for fast filling even at low pressure.

With busy families, time is often of the essence. That’s why we’ve designed Concept to give you high flow rates so your bath fills quickly whatever your hot water system, including the lower pressure gravity systems that are common in this country.

More intelligent water flow

By reducing the amount of water held in the Concept fitting by 80% there is less water to flush through. That also means there is 80% less water in the tap to stagnate and allow bacterial growth.

CERAMIX BLUE

A NEW GENERATION IN WATER EFFICIENCY

DESIGN BY
Artefakt Industriekultur, the award-winning, internationally renowned German design company was founded in 1989 by Thomas Fiegl and Achim Pohl. Ceramix Blue reflects their mission to create distinctive, everyday products that balance form with function and integrate beautifully into their surroundings.

Ceramix Blue basin mixer
Welcome to Ceramix Blue – a revolution in bathroom efficiency that brings real savings to your home.

With its intelligent design and precision engineering, Ceramix Blue perfectly balances your need to reduce water consumption with safety and control. These innovative basin fittings are specially engineered to use less water so reducing your energy costs while the bath filler and bath shower mixers include state-of-the-art thermostatic controls ensuring your family stays safe at all times. Plus, you have the added promise of excellent flow rates, whatever your water pressure.

Safety first
Ceramix Blue’s bath filler and bath shower mixers carry anti-scald thermostats that are fully compliant with the latest Building Regulations. A thermostatic valve mixes hot and cold water to a preselected safe temperature and maintains this temperature throughout, regardless of what’s happening in the rest of your home.

With its clever construction, our Cool Body feature means the product surface never gets too hot, a relief for all those little fingers in your home. Not only that, all Ideal Standard basin taps come with a temperature limit stop, which can be preset, so even when the tap is fully on, it never gets too hot.

Clever water flow to save you money
To help keep your energy costs down, Ceramix Blue has a clever 5 litre per minute flow regulator that means it uses less water to reach your desired temperature. It even leaves less water in the tap after you turn it off too.

Easy fitting
To make fitting easy and convenient, we’ve incorporated our patented TopFix feature which means you can fix your basin and bidet fittings with pop-up wastes from above the units rather than below, where there’s less space to manoeuvre.

1. Ceramix Blue handrinse basin mixer
2. Ceramix Blue thermostatic bath filler

CERAPLAN SL

PRECISION ENGINEERING AND STYLISH GOOD LOOKS

DESIGN BY
Artefakt Industriedesign is a world-renowned international design company founded in 1989 by Thomas Fieg and Achim Pohl. Ceramix Blue reflects their mission to create distinctive everyday products that balance form with function and integrate beautifully into their surroundings.
Ceraplan SL mixers and fittings are ideal choices if you’re concerned about the environment or simply want to save on water bills.

Save water, save running costs
The Ideal Standard CLICK feature appears across the full Ceraplan SL range and is designed to encourage you to save water by letting you know how much you’re using. It’s easy to use; just lift the handle until you feel a slight resistance which indicates you’re getting 50% of the mixer’s maximum flow; lift further to achieve the full flow. There’s also a 5 litre per minute aerated flow regulator so you can save even more water and cut your energy costs too.

Safe flow
Our temperature limit stop is there to ensure your youngest users stay protected from hot water. This can be preset to suit your family’s comfort and safety.

Single lever for greater control
Our ceramic disc cartridge offers you the very best in temperature and flow control so you can enjoy a long-lasting, drip-free tap that puts you in control.

Quality that lasts
All our Ceraplan SL fittings have a cast brass body that complies with European standards.

Fast and easy installation
Because fitting underneath basins and bidets can be fiddly and time-consuming, we’ve developed our patented TopFix installation that allows quick and easy installation above units with pop-up wastes.

CONE

SLEEK, MINIMALIST AND HIGHLY EFFICIENT

DESIGN BY

Domestic products all over the world bear the stamp of Cone’s creator, Robin Levien RDI. Robin is one of Ideal Standard’s most successful partners and has worked with us to create exemplary taps and mixers for over eight years. The UK’s best-selling bathroom suite, the Studio range, came from the creative mind of Robin Levien.
Created by one of the UK’s most gifted designers, Robin Levien, Royal Designer for Industry, Cone is a strictly modern range of minimalist taps, mixers and accessories.

Cone features our innovative ceramic disc technology for optimum temperature and flow control. It also gives you the option of a single lever bath filler that’s precision engineered with our new, smaller multiport cartridge for a slimmer, more discreet profile. Its ingenious Idealfill feature also guarantees a rapid bath fill – 23 litres of water per minute, faster than any other system. Cone comes with a co-ordinated range of ten bathroom accessories. For further information and a separate brochure call 0800 590311.

Single lever for greater control
Our ceramic disc technology allows you the best control of both flow and temperature with one simple movement. Its precision engineering also means it’s drip-free so there’s no wastage.

Convenient bath filling
With your comfort and convenience in mind, we’ve created a new concept in bath filling, Idealfill. This feature allows you to choose where to position your fittings, independently of the filler, on or around the bath or on the wall with the water coming from the combined filler and overflow.

Idealfill is a great choice for low pressure systems; it delivers 23 litres of water per minute, faster than any other system.

Safe flow
Our temperature limit stop is there to ensure your children stay safe at all times. These can be preset to suit your family’s comfort levels.

Improved flow rates
Cone features an intuitive multiport cartridge inside its single lever basin and bath fitting which ensures you get an improved flow rate, even at UK low pressures. The bath filler is fitted with a smaller multiport cartridge which gives it a more discreet, slimline mixer although one that boasts the same rapid bath fill capability.

Save water, shrink energy bills
Cone’s basin fittings are pre-fitted with a 5 litre per minute aerated flow regulator which means you’ll comply with water-saving legislation and cut your energy costs at the same time. Not only that, our unique CLICK feature on the basin and bidet fittings allows you to feel the difference between a 50% flow rate and the mixer’s full flow. It’s a great way to cut down on your water usage, not to mention saving on energy bills.

PRICES AND TECHNICAL INFORMATION
“I love my job because I love making products that people will treasure for a long time. I respect the people who buy our products, and I try to envision their needs when I’m designing. That’s what drives me.”

Achim Pohl
Artefakt, Germany
At Ideal Standard, we’re driven by a love of good design. We work with famous designers such as Jasper Morrison, Franco Bertoli, David Chipperfield and Robin Levien RDI to design highly distinctive, everyday taps and mixers that balance form and function and integrate effortlessly into your bathroom.

To create the fresh and innovative products that Ideal Standard is known for, our design collaborators conduct research and talk to consumers so they can understand how products are used, day in, day out. This profound understanding of people’s needs inspires them to create highly practical, easy-to-use products that are breathtaking in their ingenuity.

One of our most successful creative partnerships is with German design company Artefakt. Founded in 1989 by Thomas Fieg and Achim Pohl, Artefakt’s designs are simple and often understated yet they have a natural sensuality that makes each product highly desirable and a pleasure to use.
REWARDING FUNCTIONALITY FOR DESIGN LOVERS

Artefakt is a small team of highly focused and imaginative German designers. Simplicity and sensuality are trademarks of the Artefakt studio, rewarding the team with international recognition for its many product developments.
Active brings you a range of contemporary, sensuous and superbly contoured fittings that guarantee the best performance from your basin, shower and bath.

Created by award-winning design team, Artefakt, Active is a true design icon. In fact, in 2007, it was awarded the IF product design award. The lever and spout’s flat, angled planes combine with its smooth, cylindrical body to create a highly unusual and beautiful tap and mixer collection.

As well as boasting sleek lines, Active is packed full of smart engineering such as precise temperature and water flow control and Cool Body innovation for your family’s peace of mind.

Single lever for greater control
Our ceramic disc cartridge feature is available across the full range, putting you in total control of the level of flow and temperature with one easy-to-operate lever.

Save water, cut costs
The Ideal Standard CLICK feature on the basin and bidet fittings is there to help you save water. When you lift the handle, you feel a click telling you you’re getting half the mixer’s potential flow. For the full flow, simply lift to the max. There’s also a 5 litre per minute flow regulator enabling you to save even more water.

Fast and easy installation
To ensure you can fit your basin and bidet quickly and easily we’ve included our patented TopFix installation. This allows quick and easy installation above your units with pop-up wastes.
Protect your family
Our thermostatic bath and shower fittings ensure no blasts of freezing water or scalding hot surprises – just a consistent temperature for maximum comfort. Plus, our temperature limit stop is there to ensure your youngest users stay protected from hot water. All you have to do is set your desired water temperature.

ATTITUDE

AESTHETICS
MEET PRECISION
PERFORMANCE

Artefakt is a small team of highly talented and imaginative German designers. Simplicity and sensuality are trademarks of the Artefakt studio, rewarding the team with international recognition for its many product developments.

Attitude basin mixer
Attitude is the ultimate fitting for the modernist. Its clean, minimalist lines combine with state-of-the-art functionality to bring you a highly superior product in looks and performance.

Created by European design team Artefakt, to enhance safety and maximise water saving in your home, Attitude has a range of innovative features including our clever Cool Body technology and a choice of outlets from simple stream to waterfall for an indulgent spa experience.

Easy temperature control
Attitude’s ceramic disc cartridges in the smooth, contoured handle allow you easy control of water flow and temperature. That means you can reduce wastage and enjoy increased efficiency.

Your choice of basin mixer
Attitude’s basin mixers are available with a choice of outlets, classic or waterfall. The waterfall outlet requires a 1.5 bar pressure so if yours is a low pressure installation, our classic outlet is preferable. This should be fitted with a flow straightener. The classic version is also supplied with a flow regulator to limit the flow to 5 litres per minute, enabling you to save water.

Save water, cut costs
CLICK technology on Attitude’s Classic basin and bidet fittings means you can save water and do your bit for the planet and your purse. Simply lift the handle and you feel a click. This tells you you’re using 50% of the water flow; lift it further and you will achieve maximum flow.
Enjoy the best flow rates
Our multiport ceramic disc cartridge inside our single lever basin and bath filler means you’re guaranteed the best flow rate, even at UK low pressures. The multiport cartridge on the bath mixer is an important design consideration if you want matching fittings that perform to the same exacting standards.

Safety for your family
You can protect your children from scalding with our temperature limit stop. Attitude fittings allow you to set your desired level of heat from preset temperature positions. Not only that, our Cool Body feature on all fittings in the range means young fingers stay safe at all times.

DESIGN BY
David Chipperfield is one of the world’s most feted architects. Renowned for his sculptural buildings and fluid and elegant lines, he designs everything from taps and sanitary fittings to furniture and corporate spaces. In 2007, he won the RIBA Stirling prize for architecture.

Silver single lever basin mixer

STUNNING GEOMETRIC DESIGNS
SILVER

Designed by one of the world’s leading architects, David Chipperfield, Silver is a simple yet highly sculptural range of mixers for bath, basin and kitchen.

Perfect if you're looking to create a modernist feel in your home, Silver has been designed to complement the White range but can also be used to enhance other ranges. It features some of our most exciting innovations and gives you the choice of a single lever or dual control mixer taps.

Putting you in control
Our multiport ceramic disc technology enables you to control your basin mixers' temperature and water flow with impeccable precision, even if yours is a low pressure system.

Protecting your children
To stop young children burning their fingers, we’ve developed a temperature limit stop on our basin and bidet fittings. You can choose between several preset temperature settings which are easy to change, whenever you need to.

One CLICK and you’re saving water
Our ingenious CLICK technology on Silver’s single lever basin and bidet fittings encourages you to save water. When you lift the handle you feel a slight resistance which tells you you’ve reached the 50% flow point. For full capacity, simply lift the lever fully. There’s also a 5 litre per minute aerated flow regulator so you can save even more water and cut your energy costs too.

Rapid bath fill
Running a bath can be time consuming but not with Silver’s Idealfill feature. You can choose where to position your fittings on the rim of the bath, independent of the filler, so no more reaching around the shower screen to turn the tap on. The water comes from the combined filler and overflow. Idealfill is perfect for low pressure systems as it delivers 23 litres of water per minute, faster than any other system.

ADVANCED ENGINEERING MAKES A TIMELESS STATEMENT

Design by Artefakt is a small team of highly focused and imaginative German designers. Simplicity and sensuality are trademarks of the Artefakt studio, rewarding the team with international recognition for its many product developments.
Simple and beautifully understated, Melange is a timeless range of fittings that will blend effortlessly into any bathroom. Its simplicity belies the depth of advanced functionality that runs throughout this range. From advanced flow rates to retractable shower set and CLICK technology for water saving, Melange offers your home high performance, comfort and safety.

Designed by one of Europe’s leading creative consultancies, Artefakt, Melange’s sensual, contemporary lines are hugely tactile and will harmonise perfectly with almost any bathroom style.

For your ease and comfort
Melange features Ideal Standard’s pioneering multipart ceramic disc cartridge technology which means you can control both flow and temperature from a single, easy-to-handle lever.

Safety first
Our temperature limit stop is designed to keep your family safe by letting you decide the right temperature for you. Even when the lever is fully open, it remains safe to use.

Easy fitting
To make fitting easy and convenient, we’ve incorporated our patented TopFix feature which means you can fix your basin and bidet fittings with pop-up wastes from above the units rather than below where there’s less space to manoeuvre.

Saving you water
Melange’s CLICK technology helps you to reduce the amount of water you use by letting you feel with a click when the tap is delivering half of its flow potential. It also features a 5 litre per minute aerated flow regulator so you can save even more water.

Safe, comfortable bathing
Our dual control thermostatic bath fitting ensures your bath water temperature is maintained for maximum comfort. Meanwhile, our Cool Body innovation means the fitting is safe to the touch, particularly important when your children are using the bath.

And in the shower too, the dual controls feature a temperature handle with built-in safety stop at 40°C and a flow-control handle with ceramic disc technology for a smooth turning action. Plus, the thermostatic temperature control means no cold or hot shocks, regardless of what’s going on in the rest of your home.
At your convenience
The four tap hole bath shower mixer mounted on the bath rim has a generous spout with integrated diverter to a retractable hose with handspray. Separate hot and cold handles work even at the lowest water pressures. The bath fill has a self-cancelling diverter beneath the spout so you can easily change the flow from bath to hand shower.

“Our bathroom is the busiest room in the house but our taps have never let us down.”

Sarah Johnson
Trowbridge, UK
Driven by you and what you tell us you want, we’re constantly searching for new technology to improve our products, inside and out. We understand that you need taps and mixers that give a reliably great performance, wherever you live and whatever your water pressure. Our name is synonymous with many tap manufacturing firsts. Take our ceramic disc technology; it provides your home with easy flow and reliable temperature control.

Meanwhile, our single lever operation gives you smooth, temperature-controlled water even at high pressure. And, perfect for little hands, our Cool Body technology ensures all our fittings stay safe to touch. Not only that, our 5 litre per minute aerated flow regulator that’s fitted as standard on many of our basin mixers, allows you to save water and money. All these features combine to give you the performance of a lifetime.

Easy operation – lay back in the bath and relax. And if you need to add a little extra hot water, the smooth single lever operation makes it so easy as featured on the Attitude bath filler.

Click feature illustrated here on an Active basin mixer.

*Figures based on household of four people using a single basin fitting. Average water price £1.77/m³. Average energy price 32.2p per kWh. Average water is heated by natural gas and basin mixer is installed without an aerator based on industry average. Correct at time of going to press.
MODERN YET TIMELESS:
A DESIGN ICON

JASPER MORRISON

Jasper Morrison is well known all over the world for his elegant and witty designs. Like many industrial designers, his understanding of functionality coupled with a rare aesthetic intuition means he’s commissioned to design everything from a tray table to a tram system.
This contemporary range comes from the creative imagination of one of the UK’s top designers, Jasper Morrison. Ultra cool and featuring the uniquely styled teardrop handle on the basin, bath mixers and showers, this range is both practical and highly visual.

Jasper Morrison mixers are part of a collection that includes washbasins, furniture and baths.

Moments basin mixer

ULTRA MODERN WITH MORE THAN A HINT OF LUXURY

DESIGN BY
Artefakt is a small team of highly focused and imaginative German designers. Simplicity and sensuality are trademarks of the Artefakt studio, rewarding the team with international recognition for its many product developments.

Moments basin mixer
Moments is an award-winning range of mixers and taps, the result of our collaboration with German design team, Artefakt. Part of a collection that includes washbasins, furniture and baths, the range, with its gentle curved profile exudes luxury.

Putting you in control
Our ceramic disc cartridges in the streamlined handle allow you easy control of water flow and temperature and with no drips, you can reduce wastage.

Safety for your family
To keep your family safe at all times, Moments’ fittings allow you to set your desired level of heat from several preset temperature positions. Plus, our Cool Body feature on all fittings in the range makes them safe to touch at all times.

Enjoy the best flow rates
Our multiport ceramic disc cartridge inside our single lever basin and bath filler means you’re guaranteed the best flow rate, at high or even low pressures. And our multiport cartridge on the bath means you can have a one tap hole bath filler to match your basin mixer; an important feature for many design lovers.

1 Moments handrinse mixer
2 Moments bath filler
Unique design feature
Artefact’s novel wall mounted bath shower mixer, which won the Red Dot Design Award in 2005, features a swivel spout that diverts the water from bath fill to shower mode. Please note, this mixer works on high pressure installations only.

Controlled bathing for your comfort
Moments also gives you maximum temperature and flow control in the bath with its ExoFill combined bath filler waste and overflow option with remote mixer valve. Please note, this mixer works on high pressure installations only.

1 Moments bath shower mixer wall mounted
2 Moments bath filler four tap holes

SIMPLYU

SimplyU single lever basin mixer with oval escutcheon

ULTRA MODERN, ULTRA COOL

Design by Artefakt is a small team of highly focused and imaginative German designers. Simplicity and sensuality are trademarks of the Artefakt studio, rewarding the team with international recognition for its many product developments.
For the pure at heart, SimplyU ticks all the right boxes. This diverse range of wall or deck mounted basin mixers, designed by our creative partners, Artefakt, is the latest in cutting-edge design, ideal if you want to create a modernist theme in your home.

Part of the SimplyU collection that includes Natural and Dynamic washbasins with wall mounted furniture units, this bold collection is the style of things to come.

Optimum flow and temperature
Our pioneering ceramic disc technology is built into the SimplyU range ensuring you get the best and most reliable flow and control over temperature in a single movement.

Wall or deck mounted?
You can choose from wall or deck mounted oval or rectangular spouts, round, oval or square escutcheons. There are ten different fittings to suit your taste in shape.

Please note, the deck mounted basin mixers are suitable for high pressure installations only.
SIMPLYU

Protecting your family
Our temperature limit stop on our wall mounted basin mixer is designed to ensure the water only ever reaches the temperature you’ve preset, even when it’s on full. You can choose between various temperature settings for your family’s comfort and safety.

The wall mounted basin mixers use our innovative multiport cartridge, guaranteeing you improved flow rates and ease of use.

Matteo Baroni and Fabio Valeriani are internationally renowned architects who have a distinctly modern aesthetic. Their brand style is clean and rational and has been applied to everything from ultra modern product design such as this range to a building in the Vatican City itself.

THE BEAUTY OF MINIMALISM
With Alfiere, less is more. This inspired collection of futuristic chrome mixers and showers comes from the creative studio of Italian duo Matteo Baroni and Fabio Valeriani. They’ve brought their signature style of clean, practical lines into sharp focus for this ultra modern collection.

The inclusion of a moveable spout at the side of the barrel rather than the traditional, front positioned spout gives Alfiere a very distinct profile, perfect if you’re creating a streamlined look for your bathroom.

Optimum flow and temperature
To give you the best and most reliable flow and temperature in one single action, all Alfiere fittings come with our advanced ceramic disc technology.

Unique positioning options
Alfiere comes with a unique moveable spout that can be adjusted, allowing you to change the direction of the water flow.

Please note, Alfiere is only suitable for high-pressure installations.

“We have the absolute conviction that our process is a benchmark for the industry as a whole. All our products are produced to the highest standards and norms to ensure some of the best quality products on the market.”

Jürgen Pohl
Plant manager, Wittlich, Germany
Ideal Standard taps and mixers are always an assurance of quality. Made in Germany, the home of engineering excellence, each and every product is constructed from the best materials to be robust and hard-wearing. And because we believe in better, every tap and mixer is made to exceed both British and European standards.

All our products undergo exhaustive testing before they leave the factory. Everything from water pressure and temperature to noise levels are tested and retested. This is how we can guarantee you will enjoy faultless function and reliability.

At Ideal Standard, we have a firm eye on the future. Our highly experienced engineers are working with a number of German universities to educate and pass their skills on to the next generation of engineering talent. That’s how we’re paving the way for continued innovation in tap and mixer technology.

INSPIRED BY ARCHITECTURE, Styled TO PERFECTION

UK-based design team Seymour Powell has been at the forefront of innovation in industrial design for many years. They’ve transformed the look and performance of a range of everyday products from irons to stairlifts.

DESIGN BY

Academy basin mixer
Its stunning geometric appearance and tactile lines make Academy a design winner. This distinctive, architectural tap and mixer, created by one of the UK’s most renowned design teams, Seymour Powell, features a curved cone handle that integrates beautifully into the main body of the tap.

Academy is truly an outstanding product that’s guaranteed to become a talking point in your bathroom.

No drips and controlled flow and temperature
Academy’s ceramic disc technology coupled with its quarter turn ‘thumb action’ handles make it easy to use, giving you precision control of both flow and temperature. With Academy, there are no more drips, just pure efficient performance.

Easy fitting
To make fitting easy and convenient, we’ve incorporated our patented TopFix feature which means you can fix your basin and bidet fittings with pop-up wastes from above the units rather than below where there’s less space to manoeuvre.

Dual control two tap hole bath shower mixer complete with shower set
£432.53
LONG-LASTING STYLE THAT SAVES YOU WATER
Please note, the single lever basin mixer is suitable for high-pressure installations only.

Control water flow and temperature
Our ceramic disc technology, available across the Alto range, enables you to control temperature and water flow without drips.

Top protection
To keep your family safe at all times, we’ve incorporated a temperature limit stop on our basin and bidet fittings. You can choose between several settings, safe in the knowledge that even when the tap is fully on, the water will never be too hot.

Alto’s shower fittings also feature our innovative Cool Body technology that means they never get too hot to touch – crucial when you’ve got small children.

Save water and money
As a further water-saving strategy, our basin mixers are pre-fitted with a 5 litre per minute aerated flow regulator that complies with water-saving legislation and helps you reduce water usage.

Our single lever models also feature the ultra-smart CLICK feature for greater water control.

Reliable and extremely affordable, Alto delivers accurate water temperature and flow and, to make your life really easy, Alto’s Ecotherm shower has a fast-fix bracket for efficient installation. Combined with built-in safety controls and Cool Body technology, Alto makes a great choice for your family’s home.
Alto’s Ecotherm shower is a wall mounted shower valve and bath shower mixer that features a uniquely clever fixing bracket for a robust and efficient installation.

A MARRIAGE OF VALUE, DESIGN AND CHOICE
Proving that economy needn’t compromise on style, this sleek and modern range of mixers and taps is highly practical and adds a contemporary look to a conventional style. The gentle body lines, quarter turn valves and choice of four handles make Elements a favourite Ideal Standard design.

The compact range of bathroom fittings ensures flexibility to new bathroom installations and also makes it the perfect replacement for tired and worn out taps. Elements ceramic disc mechanism provides a smooth and precise operation that will provide many years of drip-free service and perfectly complements the choice of porcelain, Quattro, Axis, Tipo and crosshead handles.

1 Elements two tap hole bath filler with Quattro handle
2 Elements two tap hole shower mixer with Axis handles and shower set

CLASSICS MAKE A COMEBACK
Sometimes, only a classic design will do. Kingston, with its soft round styling and retro feel, is a great choice if you want to create a traditional bathroom space.

Fittings include the design classic ‘telephone’ shower cradle and a choice of individual crosshead pillar taps plus a mixer body.

Ideal Standard mixers and taps guarantee

Our confidence in the quality and reliability of Ideal Standard products enables us to guarantee all mixers and taps for five years from date of purchase. Parts are guaranteed for five years and will be replaced if found to be faulty. The guarantee does not cover general wear and tear.

Our guarantee covers all products that have been used in the manner they were intended and do not apply to any products that have been mistreated or abused in any way. Products must be installed and cared for in line with our fitting instructions and local water byelaws. The guarantee covers products in domestic use by the consumer and not in commercial or business use.

In the unlikely event the product fails within five years, we offer a free replacement or replacement parts (or nearest equivalent). Liability is limited to individual products and does not cover consequential loss or damage on installations.

---

This guarantee does not affect your statutory rights.
